Projects

Title : Bajarang Decorators (Mandap Service)

Website Link : <http://bajarangdecorators.com/>

Technology : Asp.net C#

Description : This project is mainly used to show Image's category wise to the customers. If any customer has some query, then they can message to Service provider from contact us page. When Customer send message from contact us page, then autogenerate email is send to admin and customer also if they provide their email.

Admin can manage all images from AdminPanel. They can select some images and share selected Images via generated link to WhatsApp directly. If any client Book our Service, then admin can add their Detail in admin panel. There is one functionality to add images Order wise which helps admin to search images After Completion of any Service order, System will send email with feedback form link from which customer can rate our Service.

I have also completed **Address book** and **multiuser Address Book**, which is common among all asp.net batch.
